Md. Oliullah Sarder

A MERN Stack Developer

Email: oliullah0122@gmail.com
Phone: 01643616707
Address: Barishal, Bangladesh
Github | **LinkedIn** | **Portfolio**

SKILLS

- **Expertise:** JavaScript | ReactJs | HTML5 | CSS3 | Firebase | Bootstrap5 | TailwindCSS | React Bootstrap |
- **Comfortable:** ExpressJs | NodeJs | MongoDB | SASS |
- **Familiar:** Typescript | Python |
- **Tools:** Git | Figma |

PROJECTS

Alibris-Book Resale website | Full Stack Project (MERN) | 23/11/2022 - 01/01/2023

Live Demo | **Frontend Site Github Repository** | **Server Site Github Repository**

- **Features:**
  - Dynamic Dashboard for users, sellers and admin. There users can buy products with an international payment system. Sellers can add products, and the seller has my product route to see all products.
  - A seller can delete his/her products. Also he/she can add his/her products as advertised products. But if a user pays his/her order, that product status will be sold. And then the seller can't add it as an advertised product.
  - An admin can see all users as Buyers or Sellers and can delete any user. An Admin can verify a seller.
  - A single page application and fully Responsive for Mobile and Desktop.
  - A visitor/user can search for products and if search matched it shows on the search result route.
- **Technologies, Frameworks And Packages:**
  - React | React Router DOM | JavaScript | Firebase Authentication | Axios | React Query | Tailwind | DaisyUI | CSS3 | Imgbb image hosting |
  - Express.Js | MongoDB | NodeJS | JWT Authorization | Stripe Payment Method | Local Storage |

Astrophotography-User Review website | Full Stack Project (MERN) | 08 - 18 Nov 2022

Live Demo | **Frontend Site Github Repository** | **Server Site Github Repository**

- **Features:**
  - Implement Firebase Authentication for user singUp, signIn and signOut.
  - A user can give him/her reviews on products and he/she can see his/her all reviews. Also a user can delete and update his/her reviews. If a user adds a new review on a product, it shows first.
  - A User can see all reviews for a specific product, even if he/she is a visitor. But a visitor can not add a review before login. Also a user can add service from the add service page.
  - A single page application and fully responsive for Mobile and Desktop screen.
- **Technologies, Frameworks And Packages:**
  - React | React Router DOM | JavaScript | Firebase Authentication | Axios | React Query | Tailwind | DaisyUI | CSS3 | AOS Animation Package | Imgbb image hosting |
  - Express.Js | MongoDB | NodeJS | JWT Authorization | Local Storage |

Gossipbook-Facebook Clone | Full Stack Project (MERN) | 27/12/2022 - 02/01/2023

Live Demo | **Frontend Site Github Repository** | **Server Site Github Repository**

- **Features:**
  - Implement Firebase Authentication for user singUp, signIn, google signin and signOut. To visit this site, visitors must create an account. All routes are private except the signup and login page.
  - A user can hit the like button and it will show in the UI, users can also withdraw the like to hit dislike button. Also, users can add comments to a post, it will show under the post.
  - Users can update profile, like name, email, university and living address on user about or user profile route.
  - A single page application and fully responsive for Mobile and Desktop screen. Design almost similar to Facebook.
- **Technologies, Frameworks And Packages:**
  - React | React Router DOM | JavaScript | Firebase Authentication | Axios | React Query | TailwindCSS | DaisyUI | CSS3 | Imgbb image hosting |
  - Express.Js | MongoDB | NodeJS | JWT Authorization | Local Storage |

LANGUAGE

Bangle - (Fluent) | English - (Comfortable) |

STRENGTH

Self-Enthusiastic and a hard working mindset. Try to learn new technologies day by day. And also try to learn core and fundamental things of those technologies that I explored. Also try to solve programming problems on LeetCode.
